

# Module-02

## (Technology)

As I told you in my introduction that I am done in my diploma mechanical but decided to learn new things like Frontend development. So always try to come out with my comfort zone and try to learn new things those who help me in my career growth.

In future I will adjust my schedule according to my duty and learn new things like Backend development and other skills from wherever I get chance.

So always look forward to how I get learn new things for my professional development.
